

Ask yourself...

How much did you spend on:

- Your MG's exhaust, or new wheels?
- Polishes, cleaning, fuel additives?
- **Protection against fire?**

It's true that most people spend more money, time and effort pampering and perfecting their vehicles than on car and occupant safety.*

The Fire Safety Stick:

- ▶ **Works on all major types of fire** – A, B, C, F & electrical
- ▶ **Light and compact** – fits in a glove compartment (35x280mm)
- ▶ **Longer lasting** – at least 25/50 seconds discharge**
- ▶ **Leaves no mess or damage** – no damage to engine surfaces (unlike powder extinguishers)
- ▶ **No servicing or maintenance** – shelf life of 10 years
- ▶ **Easy to use** – simple instructions

Get your priorities right. Purchase a **Fire Safety Stick** today.

**Compared to 12 seconds for a 3.5kg powder extinguisher

**DON'T BE A VICTIM
CATCH A FIRE EARLY!**

*According to Home Office statistics, there were 21,918 vehicle fires in England June 2018-2019

As seen on Jay Lenos Garage

(FSS is distributed as Element Fire in the USA)
